**Citizens' Revenue Review and Economic Competitiveness Commission**  
Economic Competitiveness Proposals

**Please Prioritize Economic Competitiveness Proposals**

1.	
2.	
3.	

- a) Create a more capable local workforce through City sharing resources and strategies to improve student achievement with schools, colleges and universities, community organizations.
- b) Reduce water pollution by significantly improving storm water runoff programs to protect and improve water quality in bays and at beaches, requiring new fees to offset \$29 million annual costs now charged to General Fund, and to provide more vigorous pollution prevention and treatment programs.
- c) Campaign for the passage of a city or regional infrastructure bond measure that would finance key sewer, water, road, storm water, park and public facility infrastructure projects and be structured around a detailed public facilities financing plan modeled after the Proposition MM measure approved by the voters several years ago.
- d) Expand the Convention Center to attract more tourist spending, generating more jobs and local tax revenue
- e) Move projects to the "front of the line" for processing if they include significant affordable housing, are placed on high frequency transit routes, are "green" developments or meet other specific public interest goals.
- f) Fees charged to developers to help pay for affordable housing (Linkage Fees) should remain as they are today, not increased to prior rates or adjusted for inflation.
- g) Reduce the number of and time consumed by multiple environmental and construction reviews for proposed development projects.
